App.js: Router
Main.js/Main.html: Main view, display samples, bind LaunchpadPlayer to keyboard events.
Search.js/Search.html: Search a video, and transform it in Sample.
Sample.js (Directive): Display a sample in the main view and load the appropriate video.
Samples.js: Manage all the samples (add, getAll, play, pause, etc...)
LaunchpadPlayer: According to a keyCode combinaison, order an action (play, pause, repeat).
